

# *The* **Aquarium**

The aquarium is a great summer attraction.

Many aquaria welcome you with a shallow touch pool where you can touch small sea animals, like starfish and hermit crabs. Then you will step into an underwater world without getting wet. The tanks are so big that you will feel like you're walking in a deep ocean, with thousands of bright-coloured fish, and even sharks, swimming around you. You can watch divers feed them by hand too! You will see animal stars, such as dolphins, seals, and killer whales, performing their stunning skills in shows. You may even get a chance to feed the seals and touch the dolphins!

Visiting the aquarium is a great way to cool off on a hot summer day.
